RE: Notice of Proposed Runway Extension — Angelina County Airport (LFK)

Dear Property Owner,

As you may be aware, the Angelina County Airport (LFK) in conjunction with the Federal Aviation Administration (FAA) and the Texas Department of Transportation (TxDOT) are in the process of preparing an Environmental Assessment (EA) to analyze the potential environmental impacts resulting from a proposed runway extension and acquisition of approximately 27 acres of land.

The County is proposing a 600-foot runway extension to Runway 25 to support economic growth, emergency services, and general aviation activity within the Angelina County region. The Airport is pursuing the acquisition of 27 acres east of Runway 25 to accommodate the extension and ensure compatibility within the runway protection zone (see Figure 1).

The County is committed to transparency and community engagement. According to county records, you own property within one (1) mile of the proposed runway extension and land acquisition. We are not looking to purchase your property (unless you have been previously contacted); however, as a courtesy we are notifying you of the proposed project and invite you to submit any questions, comments, or concerns regarding the proposed project.

We appreciate your attention to this matter and thank you for your continued support of the Angelina County Airport. It is our goal to ensure that this project proceeds in a manner that is safe, responsible, and considerate of the communities we serve!

Please direct all comments to Morgan Einspahr, Woolpert, Inc., project manager, at 720 South Colorado Boulevard, Suite 120-S, Glendale, CO 80246. You may also send comments via email to morgan.einspahr@Woolpert.com.

Sincerely,

Keith N. Wright, P.E.
County Judge
